

Akari Academy Website Project Documentation

Name: Thandokuhle Maphanga

Phase 1

1.1 Chosen Business

Business Name: Akari Academy

Business Type: Early Childhood Learning Academy

Business Overview

Akari Academy is a nurturing early childhood academy designed for children aged 3–6 years. The academy focuses on play-based learning, creativity, emotional development, movement, language exposure, and confidence building.

The academy is built around the philosophy that every child already carries brilliance and potential within them. The website was designed to communicate warmth, growth, creativity, safety, and emotional development.

The academy offers multiple learning environments called “Tiny Worlds,” each focused on a different area of child development.

Business Goals

- Provide a safe and nurturing environment for children
- Encourage creativity and confidence in young learners
- Offer structured play-based learning
- Build trust with parents and guardians
- Promote early childhood development.

1.2. Competitor Website Research

They use bright colours, playful layouts, and bold child-friendly designs that immediately make you feel welcoming and energetic. Most of the websites include pages such as Home, About, Classroom Information, Staff, Fees, Contact, Reviews, and Enquire Now sections. Information is usually organised in clear sections with large headings, images, and short paragraphs to make content easier for parents to read. Many websites use top navigation bars, rounded shapes, soft colours, and image banners to create a warm and safe atmosphere. Some websites also use cards and boxes to separate programmes and classroom information neatly. What works well is that the websites feel friendly and feels like a child setting, simple to navigate, and visually appealing for parents looking for a preschool. Some websites could improve by reducing clutter, and over use of colors. Most of the websites use CSS techniques such as Flexbox, background images, hover effects, border radius, shadows, and responsive media queries to improve layout.

1.3 Target Audience Profile

Parents and guardians with children between the ages of 3–6 years.

Audience Needs:

- Safe learning environment
- Educational programmes
- Emotional and social development for children
- Trustworthy educators
- Clear information about programmes and enrolment

Devices Likely Used: Mobile phones, Tablets, Desktop computers

Desired User Actions: Explore programmes, Learn about the academy, Contact the academy, Apply for enrolment.

Phase 2

2.1 Site Map

Home Page (index.html)

About Page (about.html)

Programmes Page (programs.html)

Contact Page (contact_us.html)

2.3 Style Guide

Colour Purpose	Hex -Code
Main Background	#f7f3ec
Header/Footer	#B8A999
Primary Green	#4E5A42
Accent Brown	#591C0E
Secondary Green	#A8B69A
Accent Pink	#e7b3b3

Typography

Heading Fonts

- Poppins
- Roboto
- Segoe UI

Body Fonts

- Sans-serif fonts
- Serif fonts for programmes content sections

Design Rationale

The colour palette was chosen to create a warm, nurturing, calming, and child-friendly atmosphere. Earthy greens and soft neutrals communicate growth, safety, creativity, and comfort.

The typography choices were selected to balance professionalism with warmth and readability.

Rounded borders, soft gradients, and warm tones were used throughout the website to support the academy's emotional and educational identity.

2.4 Content Outline

Home Page Content

- Welcome message
- Introduction to Akari Academy
- Key academy features
- Short academy philosophy

About Page Content

- Academy mission
- Academy vision
- Core philosophy
- Meaning of the name "Akari"

Programmes Page Content

- Age group programmes
- Tiny Worlds curriculum explanation
- Enrichment classes
- Learning outcomes
- Programme descriptions

Contact Page Content

- Enrolment form
- Contact details
- Parent information section
- Optional class selections

Phase 4

Phase 5

5.1 Project Overview

Project Objective

The objective of this project was to design and develop a professional multi-page business website using only HTML5 and CSS3.

The website needed to:

- represent a business professionally
- provide clear navigation
- communicate services and values
- maintain responsive design
- demonstrate semantic HTML and organized CSS structure

Akari Academy was developed as a fictional early childhood academy focused on nurturing creativity, emotional development, confidence, and learning in children aged 3–6 years.

5.2 Design Decisions and Rationale

Visual Design Decisions

The design focused on creating a calm, welcoming, nurturing, and emotionally warm experience.

Key design decisions included:

- Earth-tone colour palettes
- Rounded corners for softness
- Gentle gradients
- Large readable typography
- Warm educational imagery
- Consistent branding throughout pages

The visual identity was intentionally designed to appeal to parents seeking a caring and safe learning environment.

Layout Decisions

Flexbox layouts were used extensively to:

- create responsive sections

- align content cleanly
- improve readability
- support mobile responsiveness

Cards and profile sections were used to organize information clearly and improve visual hierarchy.

5.3 Technical Approach

HTML Structure

Semantic HTML5 was used to improve:

- accessibility
- readability
- structure
- maintainability

CSS Methods Used

CSS3 was used for:

- styling
- layout
- responsiveness
- visual effects
- typography
- spacing
- branding consistency

Media queries were used to improve usability on smaller devices.

5.4 Challenges Faced

Challenge 1: Time allocated was not enough

5.5 Future Improvements

Potential future improvements include:

- Adding JavaScript interactivity
- Adding animation effects

- Creating a backend enrolment system
- Adding a gallery page
- Adding programme booking functionality
- Adding parent testimonials
- Improving accessibility further
- Expanding mobile optimization
